

Hello,

I am working on a project and am in need of some metal fabric mesh.

There isn't anything on the spec except what I have below. Those are the requirements it must meet.

I have 4,800 L.F. total I need and it needs to be 3' tall.

- Metal fabric mesh size must be a minimum of $\frac{1}{4}$ inch and a maximum of $\frac{1}{2}$ inch.
- Metal fabric mesh must be 19 gauge minimum and 23 gauge maximum, unless waived by PM.
- Metal fabric mesh must be galvanized or aluminized.
